# Prowler: A Modern Tribute to the Classic Hot Rod Spirit.

The hot rod is an enduring symbol of freedom, expression and power. It is as much a cultural icon as drive-in theatres and rock 'n' roll. And, it is a permanent reminder of the discovery and excitement that permeated the 1950s and '60s... the era of the classic hot rod.

Now, in an era when the drive-in has given way to the drive-through and when rock 'n' roll is mainstream, the spirit of the hot rod has returned. It's Prowler, and it rekindles a passion for individualism that was often lost along the road between yesterday and today.

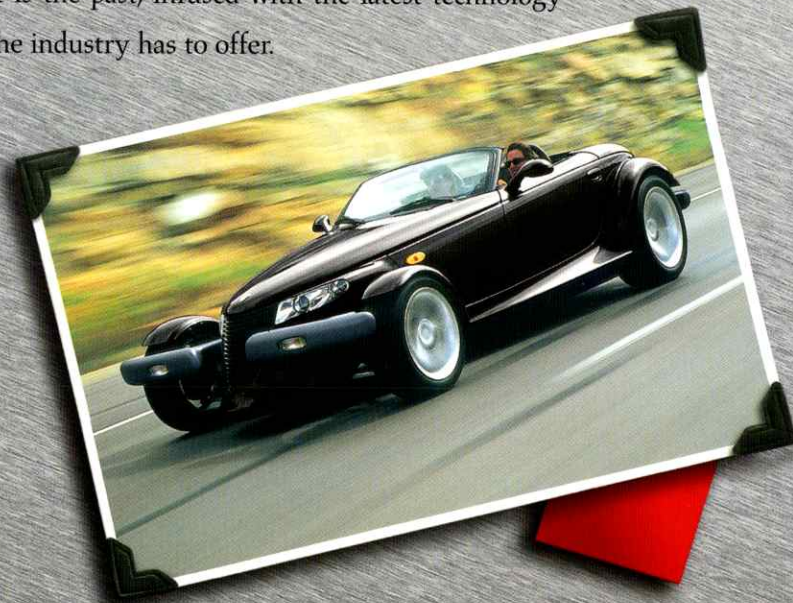

Prowler is the reinvention of the hot rod. From every angle; beneath every body panel; and, from behind the wheel, 2000 Prowler is a celebration of automotive design and engineering.

The cockpit is civilized, with power windows, leather-faced seating, an easily dropped or raised cloth top and a first-rate sound system.

And Prowler technology is cutting edge. The lightweight aluminum frame provides the cornerstone of an engineering triumph. A high-revving aluminum V6 delivers a muscular 253 horsepower, while an electronic four-speed rear-wheel-drive automatic transmission with AutoStick® override control and a four-link independent suspension system, provide finesse and superior handling. Yet, with all of its sophisticated technology, Prowler never strayed from its original vision. It brings back the feeling of a hot rod... a feeling that, until not long ago, existed only in our memories. It is the past, infused with the latest technology the industry has to offer.
